

**Conceptual Design & Mockup Science & Technology Efforts in Support of the
Family of Joint Light Tactical Vehicles
BAA 06-021**

Questions and Answers

(Updated as of 20 JUL 2006)

Question #1:

We are a foreign company. Does this restrict our eligibility to submit under this BAA?

Answer #1:

No, Section III “Eligibility Information” states... “This solicitation is open to all responsible sources other than Government entities and Federally Funded Research and Development Centers (FFRDCs).”

* * * * *

Question #2:

Is there an incumbent currently performing work (and contract number if applicable) under this BAA?

Answer #2:

No, there is no incumbent. This is a new requirement. ONR does not have a contract in place for this concept.

* * * * *

Question #3:

Pages 14-15 of the BAA provide a listing of the Program Deliverables and Reporting requirements. Performance Specifications and Technical Data are listed as deliverables. What level of fidelity/detail is required for this deliverable?

Answer #3:

General tables describing the performance features of the system are requested. We are looking for engineering analysis and modeling and simulation to help justify design approach. Documentation describing methodologies, findings, and results is desired.

Question #5:

Can ONR furnish to Contractors the relevant HMMWV documentation that was provided/used by NATC in the conduct of their study?

Answer #5:

ONR will provide additional information in this area to those that are selected for award. However, you may send a FOIA request by following the instructions on <http://www.onr.navy.mil/about/foia/>

Question #6:

Would receipt of an award under this particular BAA create any Organizational Conflict of Interest issues for a company which is already a manufacturer and supplier for military vehicles?

Answer #6:

No. The BAA is intended to stimulate technological advances in areas directly relevant to military vehicle systems. It is not the intent of this BAA to identify and fund an integrator who will combine the results from the several technologies developed and identified under this announcement. Identification of such an integrator would only be done through a separate contract—if at all.
